Work History

2021-10 / 2024-05

Senior Software Engineer
AURA

Work on complex solutions in the field of user security. Creation and support of applications. Development of browser extensions.

As a frontend developer, I participated in the development of Electron when creating a user interface.

Also, as part of my work, Is the creation of browser applications designed to collect and process data from a web page, creating agents for scraping and parsing web pages, interacted with the Public API of social networks and multimedia platforms.

My responsibilities, main requirements:

- Developing new features and improving existing ones
- Developing user interfaces
- Code review
- Collaborating with the backend team
- Supporting the application in production

Skills: `JavaScript`, `Browser Extensions`, `PWA`, `Electron`, `Typescript`

2020-02 / 2021-10

Senior Software Engineering
EPAM Systems

Worked on several large projects as an outsourcing developer related to education and finance. Developed high-load web applications from scratch. Supported ongoing projects. Collaborated and interacted with various teams and clients.

Development of user interfaces with different roles, administrative panels, CRM system interfaces. Active interaction with the backend and third-party services.

- Collaboration with international clients
- Participated in all stages of development, from initial requirements gathering and wireframing to development, testing, and post-launch support.
- Frontend architecture and component-based design
- Cross-functional teamwork
- Responsive and adaptive design
- Code optimization and performance tuning
- Writing unit tests

Skills: `React/Redux`, `JavaScript`, `Django`, `Typescript`, `NodeJS`

2016-08 / 2020-02

Frontend Developer
ZEO Alliance

Worked as a frontend developer in a product company, beginning in the marketing department. Focused on creating user-friendly and visually appealing web interfaces to enhance customer engagement and drive conversions. Later transitioning to the R&D department. Focus shifted towards more experimental and cutting-edge projects. Prototyping, researching new technologies, and developing solutions.

- Development of marketing landing pages
- A/B testing and optimization
- Performance tracking integration
- Cross-browser compatibility
- Email template creation
- Collaborating with design and content teams
- SEO improvements
